13. On information and belief, on December 4, 2012, the PTO issued the ‘275 patent, entitled “Microbiologically Sound and Stable Solutions of Gamma-Hydroxybutyrate Salt for the Treatment of Narcolepsy.” According to the information on the face of the patent, the patent was assigned to Jazz Pharmaceuticals, Inc.

15. On information and belief, on July 8, 2014, the PTO issued the ‘306 patent, entitled “Method of Administration of Gamma Hydroxybutyrate with Monocarboxylate Transporters.” According to the information on the face of the patent, the patent was assigned to Jazz Pharmaceuticals, Inc.

16. On information and belief, Jazz Pharmaceuticals, Inc. is the holder of New Drug Application (“NDA”) No. 21-196, directed to XYREM®.

17. On information and belief, Jazz Pharmaceuticals, Inc. caused the Food and Drug Administration (“FDA”) to list the ‘889 patent, the ‘219 patent, the ‘506 patent, the ‘650 patent, the ‘275 patent, and the ‘306 patent in the FDA’s publication, “Approved Drug Products with Therapeutic Equivalence Evaluations” (the “Orange Book”), in connection with NDA No. 21-196.

18. By maintaining the listing of the ‘889 patent, the ‘219 patent, the ‘506 patent, the ‘650 patent, the ‘275 patent, and the ‘306 patent, in the Orange Book, Jazz Pharmaceuticals, Inc. represents that a claim of infringement of the ‘889 patent, the ‘219 patent, the ‘506 patent, the ‘650 patent, the ‘275 patent, and the ‘306 patent “could reasonably be asserted if a person not licensed by the owner engaged in the manufacture, use, or sale of the drug.” 21 U.S.C. §355(b)(1)(G).

WATSON’S ABBREVIATED NEW DRUG APPLICATION

19. Watson filed Abbreviated New Drug Application (“ANDA”) No. 204952 seeking approval to engage in the commercial use, manufacture, sale, offer for sale or importation of a generic version of 500 mg/mL sodium oxybate oral solution. In ANDA No. 204952, Watson certified to the FDA that the ‘889 patent, the ‘219 patent, the ‘506 patent, the ‘650 patent, the

‘275 patent, and the ‘306 patent are invalid, and/or will not be infringed by the manufacture, use, sale and/or offer for sale of Watson’s 500 mg/mL sodium oxybate oral solution.

PRESENCE OF A CONTROVERSY

20. On October 29, 2014, Watson notified Counterclaim-Defendants that ANDA No. 204952 included a certification that the ‘889 patent, the ‘219 patent, the ‘506 patent, the ‘650 patent, the ‘275 patent, and the ‘306 patent are invalid and/or will not be infringed by the manufacture, use, sale and/or offer for sale of Watson’s 500 mg/mL sodium oxybate oral solution.

21. On December 11, 2014, Counterclaim-Defendants filed an infringement action purportedly under 35 U.S.C. § 271(e)(2) asserting the ‘431 patent, the ‘889 patent, the ‘219 patent, the ‘506 patent, the ‘650 patent, the ‘275 patent, the ‘203 patent, and the ‘306 patent against Watson.

22. On information and belief, Counterclaim-Defendants have not caused the FDA to remove the ‘889 patent, the ‘219 patent, the ‘506 patent, the ‘650 patent, the ‘275 patent, and the ‘306 patent from the Orange Book in connection with NDA No. 21-196.

23. In light of all the circumstances, there has been and is now an actual, substantial, and continuing justiciable controversy having sufficient immediacy and reality to warrant the issuance of a declaration of rights by the Court between Watson and Counterclaim-Defendants as to whether the products described in Watson’s ANDA No. 204952 infringe any and all of the claims of the ‘431 patent, the ‘889 patent, the ‘219 patent, the ‘506 patent, the ‘650 patent, the ‘275 patent, the ‘203 patent, and the ‘306 patent, and whether any valid claim of the ‘431 patent, the ‘889 patent, the ‘219 patent, the ‘506 patent, the ‘650 patent, the ‘275 patent, the ‘203 patent, and the ‘306 patent exists.
